Page No.
Date

1) B - simulation of human intelligence

2) B - Natural language Processing

3) B - Learning from data

4) B - collection of data

5) B - splitting text

6) A - Learning with labeled data

7) B - cosine similarity

8) B - Keyword extraction

9) B - Learning through rewards and Pentalies

10) B - make decisions and Perform action

11) B - NLTK

12) B - Remove common words "is", "the"

13) B - Nash Equilibrium

14) B - Store nodes to be explored

15) B - Text extraction from images

16) B - Feedback indicating sucess

17) C - Reinforms+ learning

18) B - Spiit into smaller units

19) B - measure similarity

20) B - TF-IDF
